--Lubricant films were made from a solution containing Pennzane® X-2000 at 0.055 wt.%, 0.11 wt.% and 0.22 wt.% and Z-DOL® at 0.1 wt.%, respectively. These films were tested in the HVBOIP tester. Both normal force F_z and frictional force F_x for each film were measured. The coefficient of friction is the ratio of F_x/F_z . Figs. 4 and 5 are plots for two Pennzane® X-2000 lubricant films. In both figures, normal force F_z , frictional force F_x , and coefficient of friction F_x/F_z are plotted as a function of the number of cycles. The coefficient of friction for the Pennzane® X-2000 lubricant film with 0.11 wt.% is about 0.4, whereas the coefficient of friction for the Pennzane® X-2000 lubricant films with 0.22 wt.% is decreased to about 0.25.--
